Agent: Kazuo IYAMA

Title of the invention: **LUBRICATING OIL COMPOSITION**

Abstract:

This invention provides a lubricative composition for a slide guide, said composition comprising one component of a sulfurized fat, a sulfurized higher alcohol, a higher aliphatic acid ester or a mixture thereof and another component of an alkyl, a cycloalkyl or an arylamine salt of phosphate, phosphite, acidic phosphate or a mixture thereof. This composition has a superior abrasion-resistance and a performance for prevention of stick-slip action at a low temperature.
